

Conference Central

Simplify your
conference
calling program
with Conference
Central Audio
from TelePacific.

- ▶ Have you ever forgotten to schedule a conference call meeting?
- ▶ Tired of paying expensive conference call rates and managing multiple invoices?

Try TelePacific's Conference Central, a worry-free reservationless audio conference service, easy-to-use, flexible and secure. Consolidate your conference expenses and receive a single invoice from TelePacific for all your telecom needs.

Convenient Secure Control

Conference Central is a flexible audio conference service offered by TelePacific. Customers may activate as many sub-conference accounts as needed and choose a plan that is suitable for their calling pattern. There is no activation or maintenance charge for each established sub-conference account. Every conference host is provided with a dedicated access number and a suite of user-friendly features:

- ▶ **Reservationless toll-free conference service¹** Dedicated dial-in number and unique passcode provide customers the convenience of sharing information anywhere, anytime, 24/7.
- ▶ **Cost effective service** Flexible options allow customers to choose a plan that best meets their business needs. Customers only pay for the minutes used for as little as \$0.08 per minute.
- ▶ **Feature-rich conferencing solution** Customers may manage the features at their finger tips by shortcut commands at the keypad. Record the conversation, lock the conference, or dial an ad hoc participant.
- ▶ **24/7 dedicated support** Technical support team available 24/7 ready to assist customer's issues and troubleshoot.

¹ International conference participants must dial a U.S. local access number. Callers accessing the local number will be responsible for LD tolls charged by their local phone company and the connection is charged to you at the same rates as a toll-free call.
