

Fax Central

Fax Central is a fax-to-email service that enables you to receive and view fax documents anywhere you have access to email. Never miss an important fax again. Anywhere you go, Fax Central goes with you.

Fax Central is a fax-to-email service that provides you with a private fax number that enables you to receive and view fax documents as electronic attachments in your email inbox. You can access faxes wherever you can access your email, and can easily view, forward, print, download, and send your faxes from anywhere you have access to your email..

Fax Central Advantages

- **Affordable:** Eliminate the ongoing high cost associated with owning and maintaining a fax machine, toners, and paper.
- **Convenience:** Faxes are delivered right to your desktop. Incoming faxes are delivered to your email via PDF format. As an open universal standard document, the fax PDF attachment can be easily accessible from any PC or smart phone.
- **Productivity:** There's no waiting at the fax machine, and you can forward faxes to multiple recipients at one time.
- **Availability:** Senders won't get frustrated by busy signals. And you won't be waiting on important faxes to arrive.
- **Archiving:** Storing faxes is simpler with digital fax documents. And searching for old ones is much quicker and easier.
- **Security:** With your own private fax number that goes directly to your own email, confidential materials can be controlled instead of sitting on a shared fax machine for unintended access by others.

How It Works

A fax is sent to your Fax Central number, and is stored digitally on the Fax Central server

It is converted to a PDF file and emailed to you

You can view it anywhere you can retrieve email

You can forward it to multiple recipients
