

# High-Speed SDSL

Avoid bottlenecks with sending large email attachments and file transfers and get better performance from two-way applications like video and VoIP.

## T1-like speeds at a fraction of the cost

Our dedicated SDSL high-speed Internet service was designed to fulfill your business' needs for an always on, secure, high-speed connection to the Internet. SDSL broadband provides our customers with lightning-fast Internet access with equal upstream and downstream capacity at speeds up to 1.5 Mbps.

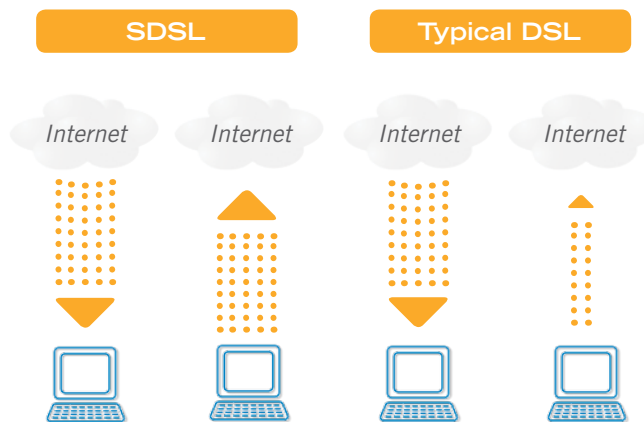

With TelePacific SDSL, you'll enjoy:

- ▶ Multiple convenient tiers of speed to choose from up to 1.5 Mbps
- ▶ SDSL modem included at no additional cost
- ▶ Web hosting
- ▶ 10 email addresses
- ▶ Domain name hosting

## The business tool for improved productivity

Fully realize all of the benefits the Internet has to offer. With TelePacific dedicated high-speed Internet service you get a business focused solution that includes the most important Internet support features available:

- ▶ Reliable 24/7 TelePacific technical help-desk service
- ▶ Full domain name registration and e-mail support

*With Synchronous DSL, the upstream bandwidth or speed is equal to the downstream direction.*

*Asynchronous DSL offers a much slower upstream speed which bogs down file transfer.*
