

SHDSL Internet

If you're in Central California area and are within two miles of our SHDSL equipment, you can get remarkable throughput for less.

Multi-megabit speeds at a fraction of the cost

Symmetric High-Bitrate DSL (SHDSL) provides high speed access to the internet over a single or multiple bonded circuit. The loops are bonded by utilizing inverse multiplexing technology via central office equipment and CPE. SHDSL is dedicated and does not share bandwidth with other services.

With TelePacific SHDSL, you'll enjoy:

- ▶ Maximum data speeds from 512k to 18M
- ▶ SHDSL modem included at no additional cost
- ▶ Web hosting
- ▶ 10 email addresses
- ▶ Domain name hosting

The business tool for improved productivity

Fully realize all of the benefits the Internet has to offer. With TelePacific dedicated high-speed Internet service you get a business focused solution that includes the most important Internet support features available:

- ▶ Reliable 24/7 TelePacific technical help-desk service
- ▶ Full domain name registration and email support

SHDSL Options
